

USE OF AUTOMATIC EXTERNAL DEFIBRILATORS (AEDs)

First Aid/Emergency Medical Care

LEARN strives to provide a safe environment for students, staff, parents and community as they learn and recreate in school facilities. In achieving a safe environment, automatic external defibrillators (AEDs) may be placed in school facilities. The automatic external defibrillators shall be used in emergency situations when sudden cardiac arrest occurs by individuals specifically trained in the application of the device. Such training shall be in accordance with the standards set forth by the American Red Cross or the American Heart Association. Only individuals who have completed the required initial training and recurrent training as specified by state law and regulations and as advised by the District's Medical Advisor will administer the device.

The AED will be stored in an accessible location in the assigned schools. The defibrillators shall be maintained and tested in accordance with the operational guidelines of the manufacturer and monitored by the school nurse. (or medical advisor, athletic director, safety coordinator, etc.) Students who inappropriately access and/or use an AED will be deemed to have violated the school's conduct code and subject to disciplinary action.

Calling 9-1-1 must not be delayed because of use or anticipated use of an AED.

Each AED within the District shall be registered with the Town's Emergency Medical Service provider and with the Connecticut Office of Emergency Medical Services. A report shall be forwarded to the local EMS provider for medical review and to the District's Medical Advisor each time an AED is activated.

The Principal or designee may specify that an authorized user may bring an AED to other areas of a school or its grounds for the purpose of standing by at specific events or activities. A communication mechanism will be established for the purpose of notifying trained authorized users within each building of the relocation of an AED from its usual place of storage.

The Executive Director or his/her designee shall establish administrative guidelines that will outline the specific responsibilities, training, management and procedures for the use of the District's automatic external defibrillators.

A regulation will delineate the procedures to be followed when using an AED. The procedure constitutes a physician's order and is to be written by the District's Medical Advisor.

Teachers and other school personnel, who have fulfilled the training requirements of this policy, providing emergency first aid involving the use of an AED shall be immune from liability if they meet the statutory requirements for immunity, which include a course in first aid that includes CPR and training in the use of AEDs provided in accordance with the standards of the American Red Cross or the American Heart Association.
